

## CAL-CHIP

Electronics, Inc.

12/07/05

Att: To all our valued Customers  
Re: Lead free/ ROHS compliance Certification

To Whom It May Concern;

Cal-Chip Electronics is certifying all parts produced under GMC, CHV, TC, \*RM, RN, \*CN, FB, NL, GLF, GHF and CV series to be in full compliance of the ROHS directive 2002/95/EC issued Jan. 27, 2003.

Concentrations of Lead, Mercury, Hexavalent Chromium, PBB, PBDE are all not present or under 1000 ppm and concentrations of Cadmium are under 100 ppm as applied to the homogenous level. Some Resistive products are under exemption, 5a (see asterik \*below). Customers requiring lead free and or ROHS compliant product should contact their sales associate on possible lead times and availability, however, as of Sep. 1, 2004, all above series of products have been under full production in accordance with the ROHS directive.

Cal-Chip has dedicated a new warehouse # 7 to accommodate all new stock meeting the ROHS directive. Lot codes on Cal-Chip labeled product will be succeeded by a "LF" indicating compliance. New labels have been integrated with the ROHS symbol next to a Cal-Chip logo (Green).

Please specify when ordering your desire to receive ROHS compliant product by placing "LF" at end of the normal Cal-Chip part number. At this point in time, Internal Cal-Chip part numbers will not change, this is for order pulling identification purposes only.

\* RM, CN, series compliant with Pb exemption 5a, (lead in glass) of ceramic, electronic components etc.
